

The file *'data_figure_1.mat'* holds all the data displayed in figure 1. Variables starting with 'CI_' as *'CI_STAP'*, hold the choice indices. The column names of the 'CI_' variables are stored in *'CI_column_headers'*.

Variables starting with 'LI_' as *'LI_STAP'*, hold the learning indices. The column names of the 'LI_' variables are stored in *'LI_column_headers'*.

Data can be visualized by following instructions in the file *'visualize_data.m'*. Load *'data_figure_1.mat'* into the Matlab workspace and place *'barValues.m'* and *'visualize_data.m'* into your current folder.
